

The American Soul: Worth Fighting For...

...So I'm Grabbing Battle Gear

Shipmates, Happy Fourth of July! As you can see, this year's card—our 30th July Fourth card—is different: it's a heartfelt request for support in my bid to become **Northeast Florida's next congressman.**

If you received our most recent Fourth cards, you were encouraged to embrace civic involvement—our **American Soul needs you!** We should use this day of fireworks to renew our commitment to preserve and enhance the world's unwavering symbol of freedom, hope and opportunity...a genuine gift from God that must always be cherished and protected.

Now this campaign is taking that commitment to a new level: about two months ago, Congressman Ander Crenshaw unexpectedly announced he's retiring. It's time again to put patriotism into practice.

Representing the hard-working men and women of Florida's First Coast and, as the only Veteran in the race, protecting this strategically important region and standing up for our Veterans is a mission I'm prepared to tackle.

Moreover, we started our 25th year at *SJK•PR* in April, and sending a warfighter businessman to represent us has never held more importance. As we sadly saw a few weeks ago just down the road, **The American Soul still faces attack both from without and within.**

(Continued on reverse)

Happy Independence Day!

KAUFMAN CONGRESS

Elect One of Us.

Make no mistake on two key FACTS:

- ★ **America works thanks to business—PERIOD.** God blessed us with drive, ingenuity, abundant natural resources and the innate persistence that comes from *enterprising freedom* to create the most vibrant economy in the world. **We're the beacon of Freedom because we created the means to grow and protect her.**

The left refuses to admit this reality: our democracy and free-market capitalism are intricately intertwined and an attack on one is a vital threat to the other.

- ★ **We're at war—the enemy, radical Islam, declared it decades ago while we remain complacent trying not to hurt anyone's feelings.** I'm a PR guy, I get it: let's not smear 90% of Muslims for the actions of the radical 10%.

Enough with politicking, **let's ban, profile, infiltrate the gathering places of Radical Haters**—those with the means, motives and methods to regularly kill our people and attempt to destroy our civilization. **How many more Americans must die before we take this threat seriously?**

These two truths will drive everything I do for the people of Florida's 4th congressional district and America. I'm prepared to help future President Trump make America great and safe again. Clearly, the era of establishment politics is over: it's time we elect one of us.

Someone who actually won't live in Congress—I've taken the Tillie Fowler Pledge: **Eight is Enough.** If you bless me with your votes for four terms,

I'll provide the same grit and integrity I did while serving our country for 27 years, **then come home to Jacksonville's vibrant small business community.** And I'm one of us who will answer **ONLY to you:** our campaign accepts no special interest or PAC money; only individual contributions.

As you prepare to celebrate our collective birthday, I humbly ask you to join us: contribute to our campaign today at ElectOneOfUs.com.

Crazy, isn't it? **Three months ago, this campaign wasn't a reality.** Now a kid from an economically-challenged family earned a college scholarship, served his country, built a business and is running for Congress. **If that doesn't describe the American dream, what does?**

Even after decades in business and the military, I'm still a proud American idealist—**one person with commitment CAN make a difference.** Help me prove that belief true: *we'll never stop fighting for The American Soul.*

God Bless America and Happy Independence Day!
